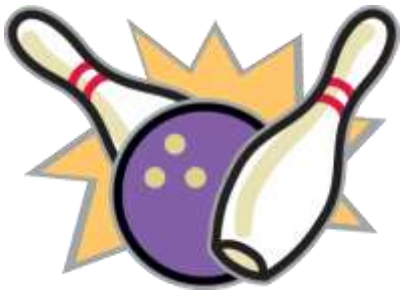
Camp Discovery



Preparing for a world that does not yet exist.

ENRICHMENT FOR ACADEMICALLY

GIFTED/ADVANCED STUDENTS

Camp Theme 2017: *Flow*

Do you ever find yourself wondering why? Why an action or event is followed by a particular effect? How two things might influence each other? This summer we will explore the concept of Flow. This includes ideas such as cause and effect in science, movement of objects or people from one place to another, story structure in novels and writing, and that flow can increase, decrease, or stop. We will ask and seek answers of questions as scientists, detectives, mathematicians, and more. Join us as we investigate the flow of everyday life with hands-on learning, critical thinking, and plenty of fun projects and activities. Let's work together to find some answers!

Sponsored by: Southeastern Louisiana University: Department of Teaching & Learning

Who: **Students in Grades 1-8 (2016-2017 school year)**

Students who are academically gifted or academically advanced (Student must be enrolled in a gifted program, be recommended by a teacher, or have successfully attended camp before.)
