Preparing for a world that does not yet exist.

ENRICHMENT FOR ACADEMICALLY
GIFTED/ADVANCED STUDENTS

Camp Discovery is an enrichment camp for high-ability, creative students. It is taught based on an interdisciplinary big concept. Past concepts include ideas such as: perspective, systems in our world, logic, and change. These concepts are taught using essential questions that help students transfer the ideas across different disciplines. While campers do read, write, do math, etc., they are not taught those areas explicitly. Instead they focus on enrichment and creativity in understanding the big concept. Students’ interests help to guide the lessons the teacher plans.

Sponsored by: Southeastern Louisiana University: Department of Teaching & Learning

Who: Students in Grades 1-8 (Finishing this school year)

Students who are academically gifted or academically advanced (Student must be enrolled in a gifted program, be recommended by a teacher, or have successfully attended camp before.)
