Counseling Program Presents:

Adlerian Play Therapy With Children Who Have Experienced Trauma

This workshop will provide an overview of the importance of utilizing Adlerian play therapy interventions when working with children who have experienced trauma. A focus on promoting healthy coping mechanisms and a rationale for integrating expressive art techniques and Adlerian play therapy theory and techniques into the counseling process with this population will be addressed. Expressive art techniques coupled with play therapy can promote coping skills and a positive outcome for clients who have experienced trauma. Specifically, by incorporating expressive arts and play therapy interventions into the therapeutic process, children who have experienced trauma can create emotional connectedness, improve self-esteem, and enhance relationships with peers and family members.

Friday, October 26, 2018
8:30 a.m.-11:45 p.m. (Registration beginning at 8:15 a.m.)
Southeastern Louisiana University, Baton Rouge Center, School of Nursing, Conference Room 109
4849 Essen Lane, Baton Rouge, Louisiana

About the Presenter: Laura Fazio-Griffith, Ph.D., NCC. LPC-S., LMFT. Registered Play Therapist-Supervisor

Laura Fazio-Griffith, Ph.D., NCC, LPC-S, LMFT, and Registered Play Therapist-Supervisor is an associate professor at Southeastern Louisiana University. She is the coordinator of the play therapy program and her research interests include: group work, child and adolescent counseling, and supervision. Prior to coming to Southeastern, she was the clinical director at a counseling and training center, where she provided counseling for children, adolescents, and families. She is has served on the Louisiana Association for Play Therapy Board for the past 8 years and is the current president of LAPT.

Workshop Objectives:

1. Participants will develop skills in play therapy for working with children who have experienced trauma to promote healthy self-esteem.
2. Participants will be able to identify interventions using expressive arts and play therapy interventions that would enhance the counseling process with this population.
3. Participants will be able to articulate Adlerian play therapy theoretical foundations that are proven to be effective with children who have experienced trauma.
