Officer David Murden
NASA Police Department
Stennis Space Center

The LEaD Series is designed to bring criminal justice leaders and other professionals working in law enforcement, corrections, courts, private sector security and other support activities to speak about their careers and professional activities. Our speakers will provide you with an inside glimpse into your future LEADERSHIP, EDUCATION and DEVELOPMENT (LEaD) that are required in the criminal justice field, you are thinking about entering.

This is your opportunity to discover the leadership qualities they’ve developed and the education required to create excellence in the private and public sector criminal justice field. The same challenges and qualities you will require, as future leaders, in your chosen criminal justice profession.

Our speakers are graduates of Southeastern who will speak about their own SLU educational experience and studies, how they selected criminal justice as a profession, and how they developed their particular interest and specialties.

In Fall 2017, Officer David Murden graduated from Southeastern Louisiana University with a bachelor’s in criminal justice and a minor in geography. Throughout his time at SLU he served in an internship program with the SLU Police Department and also was a member of Pi Kappa Alpha fraternity, and the SLU Chapter of Ducks Unlimited. After graduation Officer Murden entered Federal law enforcement at Stennis Space Center in Hancock County Mississippi. He is now responsible for enforcing Federal and state laws at Stennis.

When asked why NASA, he stated, “when you think of NASA, you think of rockets, scientist and men on the moon, but did you know they have their own police force and SWAT team.” Officer Murden will be available to help you explore a different side of law enforcement as a Federal Police Officer.

**Come join us on: Wednesday, October 10, 2018 at 5:00 p.m. in room 207, FAYARD HALL.**
