Student Success After Graduation

In Spring 2004, Institutional Research and Assessment conducted a survey of alumni who had graduated in academic years 2000-2001 and 2001-2002. Some highlights of the survey include:

- The vast majority (96%) are satisfactorily employed.
- Over three-fourths (78%) are continuing or plan to continue their education.
- Most (87%) of the respondents employed full-time, work in the state of Louisiana, with the majority being employed in the area of their Southeastern major or a related area.
- The average income of alumni exceeds the average income of Louisiana residents.
