Appendix A, Final Exam, Orientation 101	16

Introduction

All students who enter Southeastern with fewer than 30 hours are required to take Orientation 101. This one hour course, administered by Enrollment Services, is designed to acquaint students with Southeastern and help them adjust to campus life. As a part of the course, all students must take and pass the Orientation 101 Final Exam.

The Final Exam consists of 50 questions about Southeastern's history, policies, and campus activities, along with the Entering Freshmen Survey (questions 51-108). The Entering Freshmen Survey asked students about sources of information that influenced their decision to attend Southeastern, their reasons for attending Southeastern, as well as questions about their personal and social development. Also included were sections that asked the students about their level of confidence in their general education skills (based on the Board of Regents general education goals), and demographic information not available in the Student Record System. The exam booklet informs students that there are no right or wrong answers for the survey portion of the exam. A complete copy of the Orientation 101 Final Exam, including the Entering Freshmen Survey, can be found in Appendix A.

Student Characteristics Questions 101 - 108

The majority of respondents were single (91%, n=2970), while 6% (n=197) were married and 2% (n=75) were previously married. Also, the majority of students had no children (88%, n=2879), while 6% (n=192) had one child, 3% (n=102) had two children, 1% (n=44) had three children, and 1% (n=17) had four or more children.

Traditional college students are often considered to be undergraduate students that are single, with no children and between the ages of 18 and 22. However, due to changing societal and economic conditions, more non-traditional students are entering into universities. Defining non-traditional students as those undergraduate students who are over the age of 22 or married or have children, 15% (n=494) of the entering freshmen were non-traditional students, while 85% (n=2773) were traditional students.

The survey results support the notion that Southeastern has a large commuter population. The majority of respondents (42%, n=1371) travel more than 30 miles (one way) to Southeastern's main campus. The breakdown for travel to campus can be found in Table 1.

Table 1
Miles Traveled One Way to Southeastern's Main Campus

Miles Traveled One Way to Southeastern's Main Campus	Percent	Number of Respondents
Live on Campus	10%	341
Less than 5 miles	10%	310
Between 5 and 10 miles	9%	289
Between 11 and 20 miles	11%	345
Between 21 and 30 miles	18%	578
More than 30 miles	42%	1371

The majority of students (62%, n=2038) plan to work off campus, while 14% (n=469) plan to work on campus, 9% (n=279) plan to work both on and off campus, and 14% (n=449) do not plan to work at all. Of those students who indicated they plan on working while attending Southeastern, 10% (n=279) plan to work no more than 10 hours per week, 42% (n=1126) plan to work 11-20 hours per week, 31% (n=829) plan to work 21-30 hours per week, and 17% (n=468) plan to work more than 30 hours per week. Over half (61%, n=1994) of the entering freshmen had applied for financial aid.

According to Terenzini et al. (1996), a first generation student is one who has no parent with any college or university experience. Using this definition, 34% (n=1049) of entering students are first generation college students.

For the majority of entering freshmen (72%, n=2355), their goal in attending Southeastern is to obtain a degree from Southeastern. Fourteen percent (14%, n=442) plan to take a few courses and then transfer to another university. Six percent (6%, n=199) had no definite goal in mind, while 4% (n=127) plan to take a few courses in order to learn specific job skills or for their own personal interests. An additional 3% (n=84) indicated that their goal was some other goal not listed, and 2% (n=60) did not respond to the question.

**Sources of Information about Southeastern
Questions 51 - 58**

Students were asked to indicate the level to which different information sources influenced their decision to attend Southeastern rather than another university. Results are reported in Table 2, separately for beginning freshmen, transfer freshmen, and those who attended Orientation but were not enrolled as of the 14th class day.

Overall, contact with Southeastern’s students and graduates had the largest influence on the decision to attend Southeastern (mean=3.87). Visits by Southeastern’s admissions staff at their high school had the least influence in the decision to attend Southeastern (mean=2.08).

**Reasons for Attending Southeastern
Questions 86 - 100**

In this section, students were asked to indicate how important a list of reasons were in their decision to attend Southeastern. Results are reported in Table 3, separately for beginning freshmen, transfer freshmen, and those who attended Orientation but were not enrolled as of the 14th class day.

Overall, the most important reason for students' decision to attend Southeastern was "Southeastern seemed to be a friendly place" (mean=4.02). The least important reason was "Southeastern offered me a scholarship" (mean=1.99).

**Personal and Social Development
Questions 59 - 68**

Students were asked to indicate the extent to which they agreed or disagreed with statements regarding their personal and social development. Results are reported in Table 4, separately for beginning freshmen, transfer freshmen, and those who attended Orientation but were not enrolled as of the 14th class day.

Overall, students entering Southeastern believe they are well-adjusted, productive individuals. The item with the highest overall agreement was “I take responsibility for my own actions” (mean=4.63). The item with the lowest overall agreement was “I place great importance on being active in public and community affairs” (mean=3.50).

**General Education
Questions 69 - 85**

The items in this section were developed on the basis of the general education goals provided by the Board of Regents. Students were asked to indicate the level of confidence they felt regarding each skill or ability. Results are reported in Table 5, separately for beginning freshmen, transfer freshmen, and those who attended Orientation but were not enrolled as of the 14th class day.

Overall, students had the most confidence in their “Personal set of values and ethical standards” (mean=4.26). Students had the least confidence in their “ability to use mathematical and statistical concepts and tools” (mean=3.34).
