

DEPARTMENT OF KINESIOLOGY AND HEALTH STUDIES

PURPOSES OF THE DEPARTMENT

The Department of Kinesiology and Health Studies includes three undergraduate majors: Bachelor of Science in Athletic Training, Bachelor of Science in Health Education and Promotion, and Bachelor of Science in Kinesiology. Areas of study are community and worksite health promotion, fitness and human performance, athletic training, teacher certification in health and physical education, exercise science, and sport management. The Department is committed to five distinct and independent missions: (1) Pre-service teacher preparation; (2) non-teaching preparation in health promotion, sport management, athletic training, and exercise science; (3) graduate education; (4) scholarship; and (5) public service through outreach activities. The educational goal is to prepare prospective health and kinesiology educators with a quality foundation which will allow them to assume professional roles in society through careers in business, industry, agencies, hospitals, and educational settings.

A variety of sport, fitness, and dance activity classes are available to all students in the University. Non-kinesiology majors are recommended to take 100 level kinesiology laboratory courses because of their life-time emphasis.

A master's degree is offered in Health and Kinesiology. Within the degree are concentrations in health studies, health promotion and exercise science, kinesiology, and exercise science.

Students pursuing a major in the Department of Kinesiology and Health Studies may be required to participate in drug screening and criminal background checks.

Computer Literacy Validation. Computer literacy is defined in the Department of Kinesiology and Health Studies as follows: The ability to use a computer to input data, to use e-mail and to access data through the Internet. Students who complete the requirements of their major must use the computer for computer assisted learning including interactive programs, must use e-mail, and must access data through the Internet. All students, therefore, who successfully complete a major in the Department of Kinesiology and Health Studies are deemed computer literate.

HONORS DIPLOMA IN THE DISCIPLINE

The department also offers an upper-division honors curriculum allowing its students to earn an honors diploma in each *major* at graduation.

CURRICULUM IN ATHLETIC TRAINING
LEADING TO THE DEGREE OF BACHELOR OF SCIENCE

					14
Total semester hours required					127-128

Orientation 101 is not required of transfer or readmitted Southeastern students with 30 hours or more.

†A grade of "C" or better required.

*Clinical Progression Course; grade of "C" or better required.

Computer Literacy Validation

Computer literacy validation is defined by the Athletic Training Education Program as the ability to use a computer to input data, to use e-mail and to access data through the Internet. Students who complete the requirement for a major in Athletic Training must use computer assisted learning including interactive programs, must use e-mail, and must access data through the Internet. Therefore, all students who complete a major in Athletic Training are deemed computer literate.

¹Provides the student with the opportunity to practice and apply the athletic training clinical proficiencies under the supervision of a qualified clinical instructor for a minimum of 225 hours per semester. An average of about 15 hours per week.

²Provides the student with the opportunity to practice and apply the athletic training clinical proficiencies under the supervision of a qualified clinical instructor for a minimum of 150 hours per semester. An average of about 10 hours per week.

ATHLETIC TRAINING SELECTIVE PROGRESSION AND RETENTION POLICY

The Department of Kinesiology and Health Studies of Southeastern Louisiana University reserves the right to recruit, admit, and retain only those students who demonstrate evidence of being academically, physically, mentally, and emotionally capable of performing safe acts of athletic training in a professional manner.

The Department of Kinesiology and Health Studies will permit only those students who have been formally accepted in the athletic training program to register for the following clinical progression courses:

Athletic Training (ATHT): 203, 210, 241, 300, 315, 363, 367, 371, 382, 400, 415, 462, 455, 466, 469, and 471;

Athletic Training Labs (ATLB): 208, 244, 305, 320, 358, 366, 370, 405, 420, 468, 470;

Kinesiology (KIN): 326.

Students are required to submit an application for admission into the athletic training clinical progression courses. The application must be favorably acted upon by the Department of Kinesiology and Health Studies Athletic Training Admission and Retention committee before a student is allowed to enroll in the clinical athletic training progression courses. The number of students selected for progression each semester will vary according to the clinical resources.

PROGRESSION PROCEDURES AND POLICY

Students are required to submit an application before enrolling in athletic training clinical progression courses.

- a) Applications are available in the Department of Kinesiology and Health Studies Department office and from the Athletic Training Education Program web page (www.selu.edu/atep).
- b) The application for admission must be on file in the Department of Kinesiology and Health Studies office by October 15th at 4:30 p.m. in the fall semester to enroll in the following spring semester athletic training clinical progression courses.
- c) All applications for admission will be processed by the Department of Kinesiology and Health Studies Athletic Training Admission and Retention committee. The student will be notified within three weeks of their status of being permitted to enroll in the athletic training clinical progression courses.
- d) Students who make application will be considered for progression using the following criteria:

80% Academic Achievement
20% Professional Experiences Related to Athletic Training

The "**Academic Achievement**" (80%) is evaluated by the students completing their first *39 credit hours with at least a **2.5 GPA.

<u>Assignment of Point Value</u>	<u>Points</u>	<u>Percentage Score</u>
if GPA = 3.83-> applicant earns	80 points	80%
if GPA = 3.64-3.82 applicant earns	70 points	70%
if GPA = 3.45-3.63 applicant earns	60 points	60%
if GPA = 3.26-3.44 applicant earns	50 points	50%
if GPA = 3.07-3.25 applicant earns	40 points	40%
if GPA = 2.88-3.06 applicant earns	30 points	30%
if GPA = 2.69-2.87 applicant earns	20 points	20%
if GPA = 2.50-2.68 applicant earns	10 points	10%
if GPA <2.50, application denied		

*A student may be enrolled in four (4) hours of Anatomy and Physiology courses during the semester they submit their application (Fall Semester), but must complete those four (4) hours of Anatomy and Physiology with a grade of a "C" or better.

**If a student's GPA falls below a 2.5 at the end of the Fall semester of application then he/she will no longer be eligible to enroll in the athletic training clinical progression courses.

Students may elect to temporarily waive ATHT 141 for application purposes if they produce a letter from a NATABOC certified athletic trainer stating that the student has obtained at least 300 hours of practical hands-on experience under their direct supervision at the collegiate, high school, clinical or professional sports level. The student will still have to complete this course prior to being awarded their degree.

The "**Professional Experiences**" (20%) is evaluated from students producing documentation of their experiences from the following criteria:

<u>Assignment of Point Value</u>	<u>Points</u>	<u>Percentage Score</u>
High School/College Athletic Training Experience	(30 points max)	6%
Professional Conferences/Meetings Attended	(30 points max)	6%
Extracurricular Activities related to Athletic Training	(20 points max)	4%
Certifications/Professional Memberships	(20 points max)	4%

The members of the Athletic Training Admission and Retention Committee individually award points per category based on the documentation provided by the applicant. The Admissions and Retention committee members interview each applicant and further verification could possibly be requested after the interview to substantiate the applicant's claim of professional experiences. The points are awarded a numerical value and averaged with a maximum score of 100. The score is then converted to represent 20% of the applicant's total score.

- e) A medical history and physical examination will be required prior to taking the first clinical progression courses and must be submitted to the Program Director. All forms are provided by the Department of Kinesiology and Health Studies and can be located in the main office. The criteria for evaluation of the physical examination is based on the "Core Performance Standards for Admission into the Athletic Training Education Program" and agency requirements. A copy of the standards can be obtained in the Kinesiology and Health Studies Department office and on the Athletic Training web page (www.selu.edu/atep). Included in the medical history, students must also produce documentation of their vaccination status of Mumps, Measles, Rubella (MMR), Hepatitis B (or signed waiver) and TB skin test. An annual TB skin test will be required of all clinical students when enrolled in the clinical progression courses.

Students in the clinical athletic training progression courses are further required to submit evidence of current certification in cardiopulmonary resuscitation (American Red Cross-CPR for the Professional Rescuer, American Heart Association or National Safety Council--HEALTHCARE Provider) before enrolling in any athletic training clinical progression course. Students must also maintain a current certification throughout their clinical progression courses. Any student not complying will be withdrawn from athletic training progression courses.

RETENTION PROCEDURES AND POLICY

- a) After students have been accepted for progression in the athletic training program, students must maintain a degree GPA of 2.5 or better with a grade of "C" or better in each required athletic training clinical progression course.
- b) Students who complete an athletic training clinical progression course with less than a "C" may not progress to the next semester of clinical athletic training progression courses.
- c) Students who complete an athletic training clinical progression course with less than a "C" will only be permitted to enroll in that course twice.
- d) Students who complete an athletic training clinical progression course with less than a "C" will only be permitted to repeat two athletic training clinical progression courses.

The Athletic Training Admission and Retention committee will review the status of students and take proper action on matters as described below:

- a) When faculty members request the committee to review the continued eligibility of a student.
- b) When grades of a student warrant such a review (failing grades, University appeals, etc.).
- c) When faculty members report that the behavior of a student in the Athletic Training Education Program indicates a need for review. The expected behavior is outlined and described in the "Athletic Training Clinical Behavioral Standards". A copy of the standards can be located in the Department of Kinesiology and Health Studies office and in the Clinical Student's Handbook.

EQUIPMENT AND SUPPLIES

Students are responsible for providing the following equipment and supplies:

Fanny pack
Tape scissors
Shears
Stethoscope
Safety glasses
CPR mask with oxygen inlet
Penlight
Daily uniform t-shirt for wear with appropriate pants/shorts
Game uniform collar shirt and khaki pants/shorts

FIELD EXPERIENCES TRANSPORTATION

Students are responsible for their own transportation to and from clinical sites.

UNIFORM POLICY

Students are expected to adhere to the following uniform policy:

1. Athletic Training approved shirts.
2. Shorts (no cut-off jean shorts, not restrictive in fit, not greater than 6" above the knee).
3. Blue Jeans (no holes, not restrictive in fit).
4. Sweat Pants (no holes; not restrictive in fit; Colors: gray, black, white or SLU Colors).
5. Nylon Warm Up Pants (no holes; Colors: gray, black, white, or SLU Colors).
6. Game: Khaki pants or shorts, (not restrictive in fit, shorts not greater than 6" above the knee), no blue jeans/denim.
7. Fanny Pack with required supplies.
8. Optional: Hats worn should be in SLU colors/logos (No hats worn indoors).

ATHLETIC TRAINING LAB FEE

Athletic Training lab courses are assessed a lab fee as listed in the University General Catalogue not to exceed \$50.00 per semester.

BACHELOR OF SCIENCE IN KINESIOLOGY

Students pursue the BS in Kinesiology in 1 of 4 concentrations: Exercise Science, Fitness and Human Performance, Health and Physical Education Teacher Education or Sport Management.

HEALTH AND PHYSICAL EDUCATION Teacher Certification Concentration

The Health and Physical Education Teacher Certification concentration fulfills Louisiana requirements for teacher certification in both health and physical education (K-12). Graduation requirements for this concentration include a 2.5 degree GPA and earning a grade of "C" or better in all major courses plus courses in math, English, and science. Students also must achieve passing scores on teacher licensing exams (PRAXIS), participate in a group interview screening process, and complete a professional portfolio. These and other requirements of students seeking teacher preparation degrees at Southeastern are described in detail in the College of Education and Human Development section of this catalogue. A change from teacher certification to a non-teaching option (or vice-versa) will require a catalogue change.

³ Communication 211 recommended for this curriculum.

⁴ English 322 recommended for this curriculum.

⁵ Non-business elective. Students may take no more than 30 hours in the College of Business and Technology (Accounting, Economics, Finance, General Business, Business Technology, Management, Marketing).

BACHELOR OF SCIENCE IN HEALTH EDUCATION AND PROMOTION

The Bachelor of Science (BS) in Health Education and Promotion contains two concentrations: Community Health Promotion and Worksite Health Promotion. This degree will include course work to prepare individuals for employment in community and worksite health institutions, agencies and organizations. Graduates will be prepared with the skills and competencies of the Certified Health Education Specialist (CHES).
