

## Biological Sciences

---

SOUTHEASTERN LOUISIANA UNIVERSITY

### Fall 2023 Departmental Seminar Series

- 24 August Dr. Kyle Harms, Louisiana State University  
Title: “Plant Community Assembly in High-Diversity Southeastern Pine Savannas”  
Format: Meade 112
- 14 September Dr. Pamela Weisenhorn, Argonne National Laboratory  
Title: “Making connections: data and models from microbes to the globe”  
Format: Meade 112
- 28 September Dr. Keith Clay, Tulane University  
Title: “Hereditary Symbiosis in Animals and Plants”  
Format: Meade 112
- 12 October Dr. Aaron Geheber, University of Central Missouri  
Title: “Reel talk: Spatio-temporal fish assemblage dynamics during the Anthropocene”  
Format: Meade 112
- 19 October Dr. Mark Genung, University of Louisiana at Lafayette  
Title: “Beyond experiments: biodiversity change and ecosystem function in observational data”  
Format: Meade 112
- 26 October Dr. Ken Krauss, U.S. Geological Survey, Lafayette  
Title: “Are Tidally Influenced Coastal Swamp Forests Blue Carbon Ecosystems?”  
Format: Meade 112
- 2 November Dr. Ben Parrott, University of Georgia  
Title: “Exploring the organismal biology and adaptive significance of environmental sex determination in the American alligator”  
Format: Meade 112
- 9 November Dr. Liz Miller, University of Oklahoma and Scripps Institution of Oceanography  
Title: “Why are there so many kinds of fishes?”  
Format: Meade 112
- 16 November Dr. Phillip Stouffer, Louisiana State University  
Title: “Does pervasive supplemental water alter desert bird communities in Namibia?”  
Format: Meade 112
