

**Job Position:** Site Safety Technician

**Job Location:** Plaquemine Louisiana

**Education/Experience:**

High school education with 1 to 5 years industrial safety experience OR general industrial experience in the chemical manufacturing field with related safety certifications (e.g., COSS, OHST, Emergency Response); OR a BS degree in Occupational Safety, Health and Environment or other safety related field. Has knowledge of commonly-used concepts, practices, regulations and procedures utilized within the safety field.

**Job Description:**

Under the direction of the Safety Supervisor, the safety technician will inspect work areas and equipment to ensure compliance with company, state, and federal safety policies and regulations. This includes assisting with program development, review and auditing as well as training of personnel related to facility safety programs. Must be able to work a rotating shift.

Safety responsibilities also include documenting safety inspections, citing dangerous practices and recommending corrective actions. Duties include safety equipment inspection, maintenance and maintaining supply and availability. Other duties include maintaining existing programs for SDS's, Security, employee credentialing, PPE programs etc.

Training responsibilities include development and delivery of facility training programs. This includes safety related topics and emergency response training topics. Able to maintain training documentation and records for new employee training, annual refresher training and conduct monthly safety meetings as required.

Emergency Response responsibilities include participation on all emergency response teams. Must be medically qualified to wear a respirator and able to obtain a satisfactory fit test for respirators. Able to work in extreme conditions, i.e. heat, cold in all levels of PPE, including emergency response conditions such as firefighting, rescue and hazmat incidents.

Additionally the Safety Technician shall perform any additional required functions to health and safety activities. Employee shall always demonstrate safe work practices and avoid unsafe behaviors. Must be able to work independently and in a team environment and have working knowledge of Microsoft Word, Excel and PowerPoint.
