# SOUTHEASTERN LOUISIANA UNIVERSITY DUAL ENROLLMENT PROGRAM 

## MATHEMATICS 241 COURSE INFORMATION SHEET/SAMPLE SYLLABUS

 2023-2024COURSE TITLE: Elementary Statistics
ONLINE TEXT: Fudamentals of Statistics, $6^{\text {th }}$ Edition, by Sullivan accessed through the MathXL website

## CREDIT: 3 semester hours

PUBLISHER: Pearson Education

## SOUTHEASTERN INSTRUCTORS OF RECORD:

Ronni Settoon*<br>ronni.settoon@southeastern.edu<br>(985)549-2175<br>*Southeastern Contact Person<br>Craig Courville<br>craig.courville@southeastern.edu (985)549-2175

Jamie Baham<br>jamie.baham-2@southeastern.edu<br>(985)549-2175<br>Paige Foto<br>paige.foto@southeastern.edu<br>(985)549-2175

DUAL ENROLLMENT (DE) MATH 241 is a hybrid course that provides high school students the opportunity to earn college credit for Elementary Statistics while still in high school. The course content is primarily delivered online through MathXL and/or MoodleDE. The Southeastern instructors of record develop course content and provide online instructional materials such as videos and step-by-step learning aids, ungraded instructional assignments, and ungraded exam study guides to help prepare students to complete the graded assignments and the exams, which are also provided by the Southeastern instructors of record. The high school teachers will act as facilitators; they will assist with student registration and enrollment, proctor exams, provide supplemental instruction, and serve as a daily learning resource for students as they assimilate course content. The Southeastern instructors of record are assigned to specific schools, and will visit the classes periodically. The students' final course grades are assigned by the instructors of record.

PREREQUISITE: Credit in MATH 161, and eligibility for Southeastern Mathematics Dual Enrollment courses, as outlined in the Southeastern Dual Enrollment Eligibility Guidelines.

TRANSFERRING COURSE CREDIT: It is incumbent upon all students and parents to determine the transferability of Dual Enrollment course credit to other institutions. For in-state institutions, Southeastern courses can be cross-referenced using the Statewide Articulation Matrix to determine transferability (https://regents.la.gov/articulationandtransfer/).

COURSE DESCRIPTION: Mathematics 241 is an introduction to statistical reasoning. Topics include graphical display of data, measures of central tendency and variability, sampling theory, the normal curve, standard scores, Student's T, Chi Square, and correlation techniques. The typical weekly structure of the course includes in-class instruction, computer laboratory work, and out-of-class assignments. Computer and internet access are necessary for completion of all assignments, both in and out of class. Evaluations will be based on homework, quizzes, supplemental in-class paper assignments, tests, and a final exam.

CALCULATORS: Any ACT-approved calculator and the MathXL StatCrunch utility are allowed.

## BREAKDOWN OF MATERIAL COVERED

| Test | Textbook Sections Covered | Corresponding Quizzes |
| :---: | :---: | :---: |
| Unit 1 | $\begin{gathered} 1.1,1.2,1.3,1.5,2.1,2.2 \\ 3.1,3.2,3.3,3.4,3.5 \end{gathered}$ | Quiz 1 (1.1, 1.2, 1.3, 1.5), Quiz 2 (2.1, 2.2), Quiz 3 (3.1, 3.2, 3.3), Quiz 4 (3.4, 3.5), Supplement 1 |
| Unit 2 | $\begin{gathered} 4.1,4.2,4.3 \\ 5.1,5.2,5.3,5.4,5.5 \end{gathered}$ | Quiz 5 (4.1, 4.2, 4.3), Quiz 6 (5.1, 5.2, 5.3), Quiz 7 (5.4, 5.5) |
| Unit 3 | $6.1,6.2,7.1,7.2,7.3,8.1,8.2$ | Quiz 8 (6.1, 6.2), Quiz 9 (7.1, 7.2, 7.3), Quiz 10 (8.1, 8.2), Supplement 2 |
| Unit 4 | $\begin{gathered} 9.1,9.2,9.3 \\ 10.1,10.2,10.3,10.4 \\ 11.1,11.2,11.3,11.4 \end{gathered}$ | ```Quiz 11 (9.1, 9.2, 9.3), Quiz 12 (10.1, 10.2), Quiz 13 (10.3, 10.4), Quiz }14\mathrm{ (11.1, 11.2, 11.3, 11.4), Supplement }``` |

**COURSE GRADES: Percentages earned as follows determine the course grade.

## COURSE GRADE COMPONENTS

4 Tests plus a Comprehensive Final $=68 \%$ of course grade 3 Supplemental Paper Assignments = 12\% of course grade 14 Quizzes
36 Homework Sets
$=10 \%$ of course grade
$=10 \%$ of course grade

## COURSE GRADING SCALE

A 89.50\%-100\%
B $\quad 79.50 \%-89.49 \%$
C $\quad 69.50 \%-79.49 \%$
D 59.50\%-69.49\%
F below 59.50\%

Homework, quiz and test scores are reported immediately by MathXL upon submission.
The current overall course grade is available at all times through the Results page in MathXL.

[^0]WITHDRAWAL DEADLINE: The last day to withdraw from this course depends on whether the format of the course is fall-only, year-long, or spring-only. The withdrawal deadlines are given in the table below. No withdrawals from this course can be made after the date given here for each course format. Note that it is the student's responsibility to complete withdrawal forms and file them with the appropriate high school personnel.

| Deadline to Withdraw | Course Format |
| :---: | :---: |
| Friday, October 27, 2023 at 12:30 p.m. | Fall-only <br> (course ends before semester break) |
| Thursday, March 28, 2024 at 12:30 p.m. | Year-long or Spring-only <br> (course ends in the spring) |

COMPLETION DEADLINE: All coursework must be completed by the deadline shown in the table below, depending on whether the format of the course is fall-only, year-long, or spring-only. These deadlines are absolute; no credit will be given for coursework completed after the date given here for each course format.

| Deadline to Complete All Coursework | Course Format |
| :---: | :---: |
| Friday, December 1,2023 | Fall-only <br> (course ends before semester break) |
| Friday, April 12,2024 | Year-long |
| (begins in August/September, ends in the spring) |  |$|$| Spring-only |
| :---: |
| Friday, May 3, 2024 |
| (begins in January, ends in the spring) |

#### Abstract

**HOMEWORK: Homework will be assigned for each textbook section of material covered and will be completed online through MathXL. Nearly every homework assignment contains at least one short iinstructional video (1-4 minutes) that must be watched in order to access the corresponding subset of homework questions. Watching each video is worth 1 point within that homework assignment. Homework need not be completed in one sitting, but it must be completed before the due date and time. Students must click the "Check Answer" and "Save" buttons after each homework question in order for it to be recorded properly. Each homework assignment is worth 10 points, and there is a total of 36 homework assignments. At the end of the semester, the two lowest homework scores will be dropped; the remaining 34 homework scores make up $10 \%$ of the course grade.

**QUIZZES: There will be a quiz given approximately once per week, usually on material covered in $2-4$ homework sets. Quizzes will be completed online through MathXL. Students will be able to submit each quiz up to 10 times, with the best score counted toward the course grade. Quizzes must be completed before the due date and time. Students must click the "Submit Quiz" button in order for it to be recorded properly. Each quiz is worth 10 points, and there is a total of 14 quizzes. At the end of the semester, the two lowest quiz scores will be dropped; the remaining 12 scores make up $10 \%$ of the course grade.
**SUPPLEMENTAL PAPER ASSIGNMENTS: There are 3 supplemental paper assignments, worth 50 points each. These assignments will be done in class and will be monitored by the class facilitator. The dates will be given by the facilitator. The scores on these three assignments make up $12 \%$ of the course grade.

#### Abstract

**TESTS: There are 4 unit tests plus a comprehensive final exam, all completed through MathXL. There will be a practice assignment for each test/exam, available at least one week prior through MathXL. The practice assignments cover the same topics that are covered on the actual tests/exams and are intended to aid the student in studying for the tests/exams; however, they are not timed and are not intended to mimic the tests/exams. Each test/exam is worth 100 points, and the lowest of the five grades is dropped. The remaining four grades make up $68 \%$ of the course grade.

## DUE DATES AND MAKE-UP POLICY:

- Refer to the calendar in MathXL for all due dates on homework assignments, quizzes and tests. These dates will be determined and posted by your facilitator.
- Make-up work will be allowed only in the event of a valid, documented excuse. Any missed work not accompanied by a valid, documented excuse will be assigned a grade of zero and that zero will be ineligible for dropping.
- Contact your facilitator immediately if you miss a test or an assignment. He/she will instruct you on how to proceed.
- All make-up work, including tests, must be completed upon return to school, no later than two weeks after the original due date as posted on the MathXL calendar for the assignment in question. Exceptions will be possible only in the event of documented extenuating circumstances, and will be considered on a case-by-case basis. Any request for consideration of special circumstances must be submitted by your facilitator to the Southeastern Louisiana University Mathematics Department within two weeks of the original due date for the assignment in question.
- All make-up homeworks and/or quizzes must be completed before the corresponding unit test is taken.

TECHNOLOGY REQUIREMENTS AND WORKING FROM HOME: Students are expected to have reliable internet and computer access outside of class, and they will be expected to complete homework assignments and quizzes outside of class. The online material for this course can be accessed from any computer with an internet connection. Learning aids, videos, and all homework assignments, quizzes and exercises are found on MathXL at www.mathxl.com. Additional videos, learning aids, and course documents are found on MoodleDE. Once registered for the class site in MathXL, students will be able to login to the site from home with their logins and passwords. It is the student's responsibility to ensure that any computer used outside of class has the appropriate plugins for Math XL to function properly. This is done by clicking into the course and running the Browser Check found on the main page of the MathXL course. NOTE: It is the student's responsibility to ensure that all homework and quizzes submitted from home are properly saved on the site. Students should check their scores online to ensure that credit has been assigned upon submission of each and every assignment. If homework and quiz grades are not successfully sent from home and the deadline passes, the student may not be able to make up the work.

Students are expected to maintain the highest standards of academic integrity. Behavior that violates these standards is not acceptable. Actions that violate our standards of academic integrity include, but are not limited to, the following: use of unauthorized material, use of any website other than MathXL, use of an unauthorized calculator, communication with fellow students and/or other individuals during an examination, attempting to benefit from the work of another student, and similar behavior that defeats the intent of an examination or other class work. Cheating on examinations and plagiarism are considered very serious offenses and shall be grounds for disciplinary action as outlined in Southeastern Louisiana University's current General Catalogue. (http://www.southeastern.edu/resources/policies/policy detail/acad integrity.html)

TESTING RULES: Southeastern Louisiana University Mathematics testing guidelines include, but are not limited to, the following:

1. Arrive on time for testing. Each and every test/exam is only available for a certain pre-determined amount of time.
2. Your facilitator will provide you with scratch paper. No other paper is allowed.
3. All tests and final exams must be taken on school-owned Chromebooks or computers.
4. ALL belongings, including cell phones, smart watches and review materials, must be put away during testing, and should not be near your personal testing area.
5. Absolutely no cell phones, smart watches or any other handheld communication devices are allowed during testing. All cell phones must be turned OFF and put away out of sight. If a cell phone or smart watch is taken out and/or used during testing, it will result in a charge of academic misconduct and a score of ZERO on the test/exam (ineligible for dropping).
6. No personal music devices may be used during testing. Use of any such device during testing will result in a charge of academic misconduct and a score of ZERO on the test/exam (ineligible for dropping).
7. No calculator other than the TI-30XII or the calculator contained within MathXL may be used during testing. Use of another unsanctioned calculator during testing will result in a charge of academic misconduct and a score of ZERO on the test/exam (ineligible for dropping).
8. No website other than MathXL and no other area of MathXL may be accessed during testing. Accessing any such website during testing will result in a charge of academic misconduct and a score of ZERO on the test/exam (ineligible for dropping).
9. You may not write down any information pertaining to test or exam questions to take with you when you leave the classroom after testing. All scratch paper will be collected before you are allowed to leave. You may not share any test/exam information with anyone who has not taken the test/exam.

COMMUNICATION POLICY: Students are expected to use their Southeastern email addresses in all correspondence with their instructors of record.

CLASS MEETINGS: Classes will meet at times determined by the high schools. Refer to your high school schedule for times and locations of all class meetings.

## ATTENDANCE AND PARTICIPATION POLICIES:

- Class Meetings: Every student is expected to attend and actively participate in class.
- Computer Work: Every student is required to work on assignments for this course both in and out of class every week.
- If you wish to withdraw from this course, it is your responsibility to complete all procedures for withdrawing from a course.

DISABILITY ACCESS STATEMENT: If you are a qualified student with a disability seeking accommodations under the Americans with Disabilities Act, you are required to self-identify with your facilitator and/or the appropriate office at your school. That office or your facilitator will be required to forward all relevant information and paperwork to Southeastern Louisiana University. No accommodations will be granted without documentation from your school.

TITLE IX STATEMENT: Southeastern faculty and staff are committed to supporting our students and upholding gender equity laws as outlined by Title IX. Please be aware that if you choose to confide in a faculty or staff member regarding an issue of sexual misconduct, dating violence, or stalking, we are obligated to inform the university's Title IX Coordinator or Deputy Title IX Coordinator, who can assist you in connecting with all possible resources both on- and off-campus. For students who would like to speak with someone confidentially, the Student Counseling Center (985-549-3894) and the Student Health Center (985-549-2242) are both confidential resources.

FERPA GUIDELINES: Southeastern DE students have the same rights and responsibilities as any other Southeastern student. This includes the privacy protections afforded by the Family Educational Rights and Privacy Act (FERPA). Student are free to share their progress in their courses with their parent(s) if they so choose; however, course instructors may not speak with any parent about a student's progress in the course without the student first waiving FERPA rights. Southeastern's FERPA policy can be found here: http://www.southeastern.edu/resources/policies/policy detail/ferpa.html. For more information on the US Department of Education FERPA, visit the website https://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.html

[^1]OTHER UNIVERSITY AND DE POLICIES: Please see the University Policy Statements posted on MoodleDE in the Course Information section. Note that students are required to complete the Course Syllabus and Policy Validation and the Online Learning Validation on MoodleDE. More information and other important university policies and requirements can be found at these links:

- University General Catalogue
https://www.southeastern.edu/resources/catalog/2022 2023/index.html
- Student Handbook
https://www.southeastern.edu/admin/stu affairs/assets/2016 2017 studenthandbook.pdf

For Dual Enrollment Program information, including transcript requests, password resets, academic dishonesty, student eligibility, and tuitions costs, see the program website here:
https://www.southeastern.edu/future students/dual enrollment/

COURSE OBJECTIVES: Upon completion of Mathematics 241, students will be able to read and interpret graphical display of data, calculate measures of central tendency and variability, apply sampling theory, interpret the normal curve, calculate standard scores, and use correlation techniques.

| Textbook Section | DE MATHEMATICS 241 UNIT LEARNING OUTCOMES |
| :--- | :--- |
| 1.1 Introduction to the Practice <br> of Statistics | Define statistics and statistical thinking; Explain the process of statistics; Distinguish <br> between qualitative and quantitative variables; Distinguish between discrete and <br> continuous variables; Determine the level of measurement of a variable. |
| 1.2 Observational Studies versus <br> Designed Experiments | Distinguish between an observational study and an experiment; Explain the various <br> types of observational studies. |
| 1.3 Simple Random Sampling | Define a simple random sample. |
| 1.5 Bias in Sampling | Explain the sources of bias in sampling. |
| 2.1 Organizing Qualitative Data | Organize qualitative data in tables; Construct bar graphs and pie charts. |
| 2.2 Organizing Quantitative <br> Date: The Popular Displays | Organize discrete data in tables; Construct histograms of discrete data; organize <br> continuous data in tables; construct histograms of continuous data; draw step-and-leaf <br> plots; Identify the shape of a distribution. |
| 3.1 Measures of Central | Determine the arithmetic mean, median, and mode of a variable from raw data; <br> Explain what it means for a statistic to be resistant. |
| Tendency | Determine the range, standard deviation, and variance of a variable from raw data; <br> Use the Empirical Rule to describe data that are bell-shaped; Use Chebyshev's <br> inequality to describe any set of data. |
| 3.3 Measures of Dispersion | Approximate the mean and standard deviation of a variable from grouped data and <br> compute the weighted mean. |
| Tendency and Dispersion from <br> Grouped Data | Determine and interpret z-scores, percentiles, and quartiles; Check a set of data for <br> outliers. |
| 3.4 Measures of Position and <br> Outliers | Compute the five-number summary; Draw and interpret boxplots. |
| 3.5 The Five-Number Summary <br> and Boxplots | Draw and interpret scatter diagrams; Describe the properties of the linear correlation <br> coefficient; Compute and interpret the linear correlation coefficient; Determine <br> whether a linear relation exists between two variables; Explain the difference between <br> correlation and causation. |
| 4.1 Scatter Diagrams and <br> Correlation | Find the least-squares regression line and use the line to make predictions; Interpret <br> the slope and the y-intercept of the least-squares regression line; Compute the sum of <br> squared residuals. |
| Compute and interpret the coefficient of determination. |  |
| 4.2 Least-Squares Regression |  |
| variable; Interpret the mean of a discrete random variable as an expected value; |  |
| Compute the standard deviation of a discrete random variable. |  |

| 6.2 The Binomial Probability Distribution | Determine whether a probability experiment is a binomial experiment; Compute probabilities of binomial experiments; Compute the mean and standard deviation of a binomial random variable; Graph binomial probability distributions. |
| :---: | :---: |
| 7.1 Properties of the Normal Distribution | Use the uniform probability distribution; Graph a normal curve; State the properties of the normal curve; Explain the role of area in the normal density function. |
| 7.2 Applications of the Normal Distribution | Find and interpret the area under a normal curve and find the value of a normal random variable. |
| 7.3 Assessing Normality | Use normal probability plots to assess normality. |
| 8.1 Distribution of the Sample Mean | Describe the distribution of the sample mean: normal and non-normal population. |
| 8.2 Distribution of the Sample Proportion | Describe the sampling distribution and compute probabilities of a sample proportion. |
| 9.1 Estimating a Population Proportion | Obtain a point estimate for the population proportion; Construct and interpret a confidence interval for the population proportion; Find the sample size needed for estimating a population proportion within a given margin of error. |
| 9.2 Estimating a Population Mean | Determine t-values; State properties of Student's t-distribution; Construct and interpret a confidence interval for a population mean; Find the sample size needed to estimate the population mean within a given margin of error. |
| 9.3 Putting it Together: Which Procedure Do I Use? | Determine the appropriate confidence interval to construct. |
| 10.1 The Language of Hypothesis Testing | Determine the null and alternative hypotheses; Explain Type I and Type II errors; State conclusions to hypothesis tests. |
| 10.2 Hypothesis Tests for a Population Proportion | Explain the logic of hypothesis testing; Test hypotheses about a population proportion; Test hypotheses about a population proportion using the binomial probability distribution. |
| 10.3 Hypothesis Tests for a Population Mean | Test hypotheses about a mean and understand the differences between statistical significance and practical significance. |
| 10.4 Putting It Together: Which Method Do I Use? | Determine the appropriate hypothesis test to perform. |
| 11.1 Inference about Two Population Proportions | Distinguish between independent and dependent sampling; Test hypotheses regarding two proportions from independent samples; Construct and interpret confidence intervals for the difference between two population proportions; Test hypotheses regarding two proportions from dependent samples; Determine the sample size necessary for estimating the difference between 2 population proportions. |
| 11.2 Inference about Two Means: Dependent Samples | Test hypotheses regarding matched-pairs data; Construct and interpret confidence intervals about the population mean difference of matched-pairs data. |
| 11.3 Inference about Two Means: Independent Samples | Test hypotheses regarding the difference of two independent means; Construct and interpret confidence intervals regarding the difference of two independent means. |
| 11.4 Putting It Together: Which Method Do I Use? | Determine the appropriate hypothesis test to perform. |

[^0]:    **PLEASE NOTE: All policies on course grading, including percentage weights of the different types of assignments and dropping of assignments and tests/exams, are currently under review and are subject to change for the 2023-2024 school year.

[^1]:    APPEAL AND CHANGE OF GRADE: After a final course grade is recorded in the Records and Registration Office, a change of grade must be approved in sequence by the instructor of record/coordinator for DE math (Ms Ronni Settoon), the instructor's department head, and the academic dean of the College of Science and Technology. In the event of a contested final course grade, a student's written appeal of the grade must be submitted to the instructor within thirty (30) calendar days of final grades for the term being due. The grade appeal should also be submitted to Dr. Jeffrey Temple, Assistant Vice President for Academic Programs. Students wishing to appeal their final course grades should refer to the university's official Appeal and Change of Grade Policy here: http://www.southeastern.edu/resources/policies/policy detail/appeal grade.html.
